

emSigner Making Distributor Management Accurate and Fast

What was once a vision is now reality! No more filing cabinets, no more paper trail, no more wasting time and no more frustration. Instead you save time and money, and also increase your efficiency using emSigner. Leveraging this innovative digital signing and workflow management solution, distributors can digitize, automate and streamline several previously paper-intensive processes including storage, management and signing of distributor agreements, contracts, tax compliance documents, invoice and purchase orders, warranty forms, etc.

The core of emSigner is designed to offer high-end security and flexibility with multiple signing options, paired with easy integration into any existing application ecosystem. This makes it an ideal solution for creating an end-to-end paperless ecosystem in the distributor space.

Here are some of the salient features of emSigner:

- emSigner allows you to digitally sign documents in serial, parallel or bulk from anywhere, through any device instantly thus enabling effective paperless office transformation
- emSigner's audit trail coupled with support for multiple types of digital signatures enables it to meet or exceed regulatory requirements such as EU eIDAS legislation, US ESign Act, Indian IT Act and many more
- Support for token based digital signatures and remote signing
