

eMudhra launches emSigner, a Paperless Office Solution on Salesforce AppExchange

emSigner

We are happy to announce that we have launched our flagship solution emSigner on the Salesforce AppExchange. By leveraging the power of the AppExchange platform we strive to help our customers close deals faster thus ensuring quicker revenue generation, reduced costs and enhanced customer experience, all the while being compliant with global standards for eSignature.

Salesforce AppExchange is the world's leading enterprise cloud marketplace, empowering companies to sell, service, market and engage in entirely new ways. By launching emSigner on AppExchange, we've made our paperless solution available to all Salesforce customers on the go so they can quickly and easily close deals over the cloud. Salesforce customers can use the global standard for eSignature to close more deals faster – anytime, anywhere on any device; thus eliminating the process of scanning documents and manually entering data back into Salesforce.

Listed below are a few unique value adds:

- emSigner app allows you to sign documents from anywhere, through any device instantly thus enabling effective paperless office transformation.
- emSigner can enable cross-border signatures with certificates from any CA globally. We're not just restricted to eSignatures
- Sophisticated form features allows unparalleled flexibility in document template creation, signature patterns, and more.

emSigner powers millions of users and hundreds of large organizations in their Digital Transformation journey. Join the emSigner community and visit us at the link provided below.
