

emSigner Digital Signatures on Sage X3

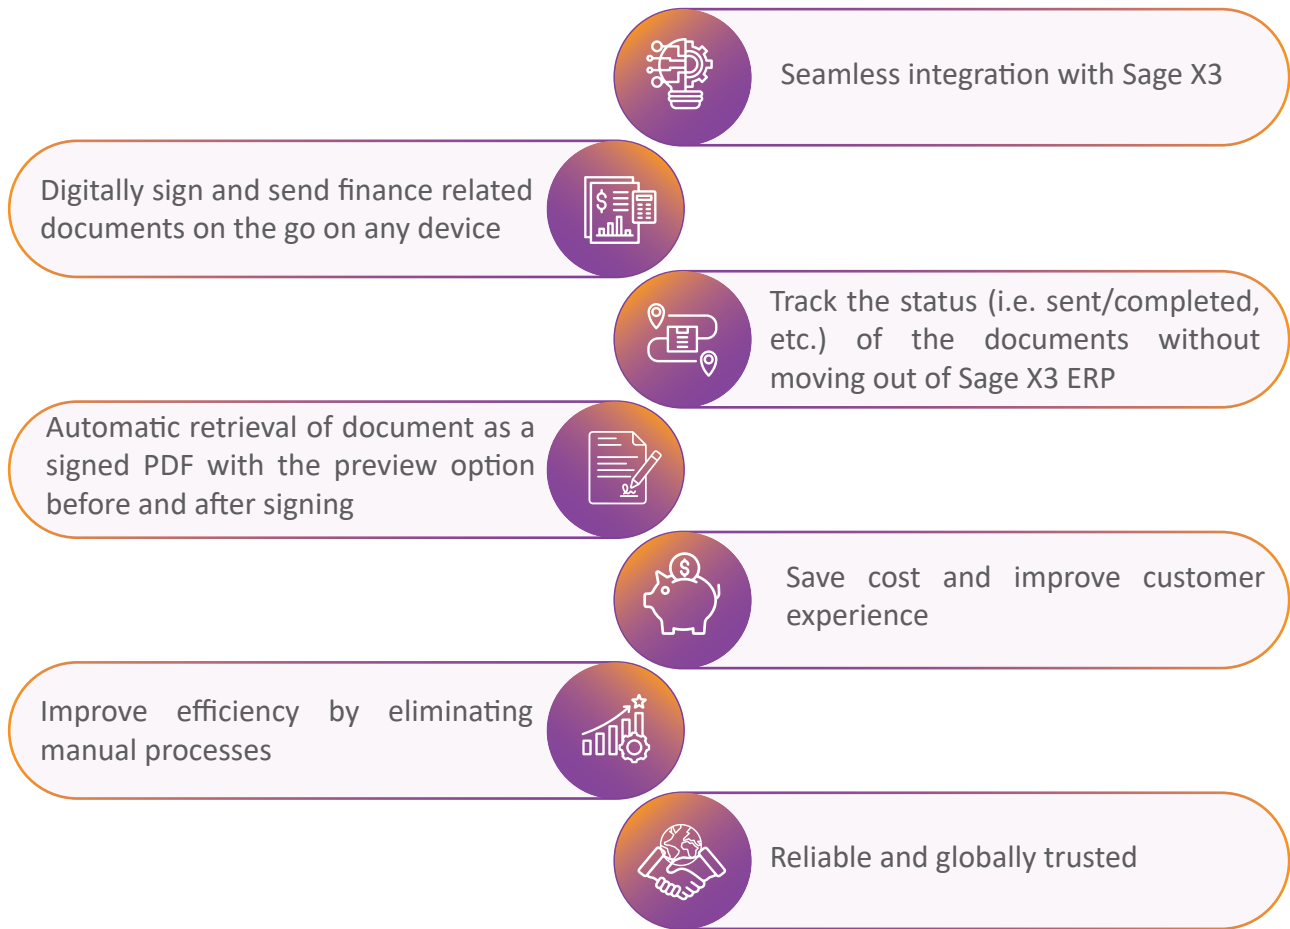

E - Signature

emSigner: Driving Document Processing Automation Using Digital Signatures on Sage X3

Facilitate automated digital signing of finance documents such as POs by internal or external parties — such as employees, vendors and customers — as per global signature standards and go completely paperless on Sage X3.

Value Proposition

Powerful Features

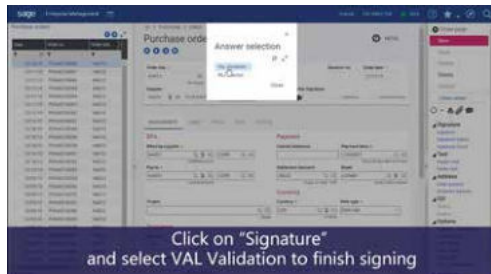

- Support for multi-party Cloud Signing using API and Signing Gateway
- On-premise deployment with HSM integration for bulk signing
- Signed documents are stored on SAGE X3 platform
- Complete traceability through audit logs
- Embed QR codes into signed documents for offline verification

Other Key Highlights

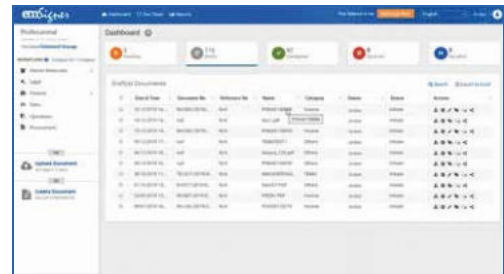

- User Friendly UI/UX
- End-to-end Encryption
- Access to Cloud Document Stores
- Open API Stack
- 2-factor Authentication
- Pre-integrated Signature Pads
- Long Term Validity Signatures and Time-stamping API for Long Term Archival of Documents
- Document Inter-linkage
- Access Management

How it Works?

Step 1: Login to Sage platform, select the PO that needs to be signed, click on 'Signature' button and select 'VAL Validation'

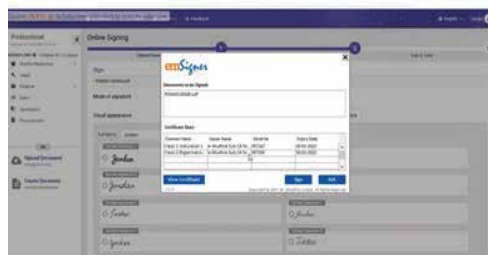

Step 2: Login to emSigner application, navigate to 'Draft' folder and select the PO to be signed

This will push the PO onto emSigner platform.

Step 3: Select the Digital Signature Certificate and sign the PO
