

Paperless & Digital Transformation

Why print, sign, scan paper? When you can digitally sign!

Introducing emSigner, a fully secure and automated digital signing and workflow solution which can be accessed from anywhere, anytime, and can be used by enterprises, SMEs and individuals.

emSigner allows you to design, control, and manage workflows and have all parties digitally sign without pen and paper using legally valid electronic signatures. This reduces hassle of managing the physical paper and its associated costs and time. **emSigner is secure, fast and reduces costs up to 80%!**
